

Emil urell will be connecting dots for the audience showing how some of our greatest discoveries were made by people who marched against common belief. The energy generating device that will be presented was met with skepticism however his fortitude resulted in a system that could change the alternative energy industry.

His innovative device, [The Synergine™](#), harnesses energy from hot and cold water. Heat is one of our most wasted energy resource, come see how it has been harnessed.

Emil urell grew up in Port Huron graduating with honors from Port Huron Northern High School. He continued his education graduating top of his class from Calvin College with a degree in Electrical Engineering. His career spans almost 20 years with firms like Johnson Controls, Fleetwood Group and Innotec designing electronic hardware.
